OBJECTIVE

Seeking a Data Analyst role using Python, SQL and dashboards to turn business questions into reliable reporting and practical recommendations, with a focus on data quality, KPI analysis and stakeholder decisions.

EDUCATION

University of Technology Sydney **Feb 2025 – Nov 2026**
Master of Data Science and Innovation GPA: 6.67/7

University of Greenwich **Sep 2019 – Sep 2023**
Bachelor of Science in Computing

AWARDS

State Asphalts Intelligent Transport Solutions Award
UTS Tech Festival 2026 — GenAI Hackathon · 2 July 2026.

SKILLS

Programming & data analysis: Python, SQL, pandas, NumPy, Jupyter, scikit-learn, PyTorch.

Data engineering: Airflow, dbt, PostgreSQL; data cleaning, validation and dimensional modelling.

Visualisation & reporting: Streamlit, Plotly, Tableau, Excel; KPIs and visual storytelling.

NLP & workflow: VADER, NLTK, GenAI-assisted text analysis; Git, Jira, Trello, Postman.

WORK EXPERIENCE

Inetzero | Data Labelling / Map Analyst **Mar 2024 – Aug 2024**
In collaboration with Enveritas · Da Lat, Vietnam

- Labelled and categorised datasets against project specifications to support machine learning model development.
- Worked with QA teams to audit annotations, resolve feedback and improve labelling workflows.

FPT Information System | Business Analyst Intern **Aug 2021 – Dec 2021**
Ho Chi Minh City, Vietnam

- Prepared SRS, FRS and BRD documents and user guides for development and client onboarding.
- Supported UAT, documentation reviews and software project planning with cross-functional teams.

ACADEMIC PROJECTS

NSW Road Safety Dashboard | Lead Developer

- Led core Streamlit development for 18,939 NSW crash records across 130 local government areas.
- Prepared and validated data with pandas; built KPI filters, Plotly charts and coordinate maps.
- Reported hotspot and temporal patterns for exploratory stakeholder decisions, documenting assumptions behind hypothetical intervention scenarios.

Airbnb & Census Analytics Pipeline

- Built manually triggered Airflow ingestion from Google Cloud Storage to PostgreSQL for May 2020–Apr 2021 listing data, preserving source-month provenance.
- Structured 18 dbt models into Bronze, Silver and Gold layers and three reporting marts for listing, host and property analysis.
- Wrote SQL reporting queries on estimated revenue, demographics, host concentration and mortgage coverage for exploratory regional comparisons.

Tesla Market Research & Customer Insights

- Researched Australian EV competition and Tesla's value proposition using secondary market sources to frame customer-insight questions.
- Applied GenAI-assisted NLP, VADER sentiment analysis and theme coding; validated review data and compared sentiment with star ratings.
- Proposed a Likert-scale customer survey and produced a research poster connecting evidence, limitations and marketing recommendations.
